# APPENDIX A: INTERNATIONAL VERSION OF THE ICCS 2022 QUESTIONNAIRES

## Overview

The ICCS 2022 international database includes data for all questionnaires administered as part of the ICCS 2022 assessment. The ICCS 2022 survey was comprised of six separate questionnaires, which will be described in the following sections:

- Section 1: School questionnaire
- Section 2: Teacher questionnaire
- Section 3: International student questionnaire
- Section 4: European student questionnaire
- Section 5: Latin American student questionnaire (English and Spanish)
- Section 6: National contexts survey

Each section contains the international version of the questionnaire; the corresponding variable name is provided for each question. The ICCS 2022 questionnaires were designed to provide an opportunity for individual countries to modify to some questions or response options, enabling participating education systems to include the appropriate wording or options most consistent with their own national systems, languages, and cultures. In the international version of the questionnaires, such questions contained instructions to the National Research Coordinators (NRCs) to substitute the appropriate wording for their country and/or to modify or delete any inappropriate questions or options. These instructions were indicated in the questionnaires by text inserted within angle brackets (<country-specific>). NRCs were asked to substitute, if necessary, an appropriate national adaptation that would retain the same basic interpretation as the text within brackets. Appendix B of this user guide documents all national adaptations.

### **INTRODUCTION TO THE SCHOOL QUESTIONNAIRE**

Thank you for taking part in the 2022 International Civic and Citizenship Education Study. The purpose of this study is to investigate in a range of countries the ways in which young people in [target grade] are prepared to undertake their roles as citizens.

In order to understand the context of student responses, we need information from you, as school [principal, head teacher, school head] about the school context in which the students' civic and citizenship education takes place.

The conception of civic and citizenship education underpinning ICCS 2022 focuses on the individual student and reflects a view that learning about civics and citizenship results from a range of processes that take place in different environments. Civic and citizenship education, while entailing civic knowledge and understanding, embraces the development of attitudes towards aspects of civic life and dispositions to participate actively and responsibly in the life of communities (home, school, local community). In this regard, the characteristics of a school as a learning environment are equally important as the contribution of teachers of all school subjects.

Please help us to understand the findings from the student assessment by completing this school questionnaire.

All information that is collected in this study will be treated confidentially. At no time will the name of any school or individual be identified. While results will be made available by country and by type of school within a country, you are guaranteed that neither your school nor any of its personnel will be identified in any report of the results of the study.

You may find that some of the questions seem unusual or are not entirely relevant to your school or to schools in [country of text]. Please take into account that this questionnaire has been developed for an international study and has to be used in different school systems.

**Please answer the questions with reference to [the school of the sampled students] as a whole and to the current school year.**

In answering the questions please refer to the following definition of 'school': A school is [to be country adapted].

**For some of the questions you are asked to answer referring only to [target grade] students. Please look at the instructions given in each of the questions.**

The time needed to complete this questionnaire is about 30 minutes.

**We thank you for your effort and cooperation!**

### INTRODUCTION TO THE TEACHER QUESTIONNAIRE

Thank you for taking part in the 2022 International Civic and Citizenship Education Study. The purpose of the study is to investigate in a range of countries the ways in which young people in [target grade] are prepared to undertake their roles as citizens and specifically what aspects of schools and education systems are related to achievement in and attitudes to civics and citizenship.

The conception of civic and citizenship education underpinning ICCS 2022 focuses on the individual student and reflects a view that learning about civics and citizenship results from a range of processes that take place in different environments. Civic and citizenship education, while entailing civic knowledge and understanding, embraces the development of attitudes towards aspects of civic life and dispositions to participate actively and responsibly in the life of communities (home, school, local community). In this regard, the characteristics of a school as a learning environment are equally important as the contribution of teachers of all school subjects.

Teachers are key factors not only in providing students with the necessary knowledge, understanding and skills that enable them to actively and consciously exercise their role as citizens, but also in the development of students' open and democratic attitudes.

This is why this questionnaire is addressed to all teachers and not just to those who teach subjects more closely related, content-wise, to civic and citizenship education. We are asking you to provide us with information on the school context in which the students' civic and citizenship education takes place.

Please answer the questions with reference to your own teaching practices in this school **during the current school year**. For some of the questions you are asked to refer **only** to the [target grade] students. **Please look at the specific instructions given in each question.**

All information that is collected in this study will be treated confidentially. At no time will the name of any school or individual be identified. While results will be made available by country and by type of school within a country, you are guaranteed that neither your school nor any of its personnel will be identified in any report of the results of the study.

The time needed to complete this questionnaire is about 30 minutes.

**We thank you for your efforts and cooperation.**

# [INTRODUCTION TO THE STUDENT QUESTIONNAIRE]

---

In this questionnaire you will find questions about:

You and your home

Your activities at and outside of school

Your views on various political or social issues

Please read each question carefully and answer as accurately as you can. In this questionnaire, you will normally answer by ticking a box. There are also a few questions where you will need to write a short response.

[Only for PBA:] If you make a mistake when ticking a box, cross out or erase your mistake and mark the correct box. If you make an error when writing an answer, simply cross it out and write the correct answer next to it.

**In this questionnaire, after asking some questions about yourself and your home, we are mostly interested in your opinions and expectations about important topics in society. Therefore, your responses should be those that best reflect your personal views.**

You may ask for help if you do not understand something or if you are not sure how to answer a question.

**Your answers will be combined with those from other students and only be used calculate totals and averages in which no individual can be identified. All information provided will be confidential and nobody will be able to see your answers.**

## Introduction

This survey questionnaire is addressed to National Research Coordinators (NRCs), who are asked to supply information about their country's approach to educating students on civic and citizenship education. This will help provide important background information for interpretation of the data collected in other parts of the International Civic and Citizenship Education Study (ICCS). Your responses are vital in helping to provide a context for, and a better understanding of, the study results.

We ask that you complete this survey questionnaire, working with others in your country as necessary (e.g., ministries and departments of education, relevant non-government organisations, specialist organisations concerned with civic and citizenship education, and teacher associations).

It is important that you answer each question carefully and concisely and provide additional information where requested so that an accurate picture of your country's approach to civic and citizenship education is presented, particularly in relation to the target population (typically Grade 8).

In order to help you to complete the survey as accurately and concisely as possible there are accompanying **Notes for Guidance**. It is recommended that you read these first before beginning to complete the survey and refer to them when answering the questions in the sections of the survey.

Please ensure that the survey is completed by [date]. When your contribution is finalised, we would ask that you contact the International Study Centre ([iccs@acer.org](mailto:iccs@acer.org)).

Thank you for your help with ICCS 2022!

**A. Education System**

**A.1. BACKGROUND**

**Q1** **Have there been any changes introduced to the structure and organisation of primary and secondary education in your country since 2016?**

*Please refer to the Notes for Guidance for a rationale for choosing this specific time period.*

XA4G01

*(Please mark **one** choice only)*

Yes

No

XA4G01T

If you answered 'yes', please describe, in brief, the nature of the changes and provide references to relevant documents:

# APPENDIX B: NATIONAL ADAPTATIONS OF INTERNATIONAL QUESTIONNAIRES

## Overview

This appendix describes national adaptations made to the international version of the ICCS 2022 questionnaires. This information provides users with a guide to evaluate the availability of internationally comparable data for use in secondary analyses involving the ICCS 2022 questionnaire variables.

Questionnaire adaptations include questions that countries were required to adapt, questions that were not administered, and questions that countries modified to suit their national context.

The adaptations to questionnaires are presented in three sections: i) language of test administration; ii) general or common cultural adaptations; and iii) other adaptations specific to individual systems.

## Language of test administration

This information indicates in which language the student administered the civic knowledge test. It was not part of the test data itself but was tracked by the national centers. The values for the systems are given in the table below. The corresponding values are included in the international student questionnaire data file (ISG) as variable ITLANG.

## General adaptations

General adaptations relate to text passages in the international English version of the instruments for which it was mandatory (or at least highly likely) to adapt them to the specific national settings and terminology and which were used several times throughout the questionnaires. Mandatory cultural adaptations were indicated using angle brackets (< >) in the international version, for instance, the term <Target grade>, which was used several times in the school and the teacher questionnaires. The tables in this section include back-translations into English of those general terms.

## Adaptations specific to individual systems

Adaptations specific to individual systems are presented in five sections corresponding to the ICCS 2022 questionnaire types:

- School questionnaire
- Teacher questionnaire
- International student questionnaire
- European student questionnaire
- Latin American student questionnaire

For each question that was adapted, a national entry is included if the version of the question administered in a country was different from the international version. For each question, the following is provided:

- Question number
- Question stem and response options
- Variable name(s)
- National adaptation, listed by country

Each entry is assigned either Code D or Code X representing the following meanings:

**Code D:** National data for the country are included in the international database. This code is used for questions that are considered comparable to the international version.

**Code X:** National data for the country are not included in the international database. This code is used for questions that were not administered, not applicable, or deleted for any of several reasons (e.g., not internationally comparable, removed per country request, removed due to other data problems).

# APPENDIX C:

## VARIABLES DERIVED FROM THE SURVEY DATA

### Overview

This appendix documents all the variables in the ICCS 2022 data files that were derived from the survey variables. These derived variables were used to report data in the ICCS 2022 international reports, and, as they can be used for secondary analyses, are provided as part of the ICCS 2022 international database.

This appendix comprises six sections, each reporting the derived variables associated with the individual survey instruments:

- Section 1: School questionnaire
- Section 2: Teacher questionnaire
- Section 3: Student civic knowledge test
- Section 4: International student questionnaire
- Section 5: European student questionnaire
- Section 6: Latin American student questionnaire

Each section lists first the indices and then the scales derived from survey variables in the order of the variables that were used to derive the variable as they appear in the instruments.

The following information is provided for each derived variable (indices and scales):

- Variable name: The name of the derived variable
- Description: A description of the variable content
- Procedure: A procedural description of how the derived variable was computed
- Source: Source variables used to derive scale or index

The following additional information is provided for each scale:

- Interpretation: A description of how to interpret the scale
- Trend status: Indicating if the scale is the same as in ICCS 2009 or 2016, or if it is new for ICCS 2022

There are several variables in the student questionnaire that countries could choose to administer as a national option or where answer options received country-specific meaning. As these variables were used by several countries, they are included in the ICCS 2022 international database. The variable name and label as well as their values (codes) and labels are provided in the “National option variables” part of Section 4 of this Appendix. The values are coded such that they are unique across countries. The last two digits represent the coding within a country’s questionnaire. The three to six leading digits represent the numeric country codes as used in variable

IDCOUNTRY, for example code “57801” of variable IS4G04AN represents option “1” in the student questionnaire from Norway indicating a student that was born in Norway (IDCOUNTRY = “578”).

	Number of boys	IC4G21A	
	Number of girls	IC4G21B	

Variable Name	C_SCSIZE_CAT		
Description	Number of students enrolled at school- categorized		
Procedure	Categorize C_SCSIZE		
Source	On [1 September 20xx], what was the total school enrolment (number of students)?		
Recode	1 = 1-300 2 = 301-600 3 = 601-900 4 = more than 900		

Variable Name	C_GENROL (available in the Restricted Use File)		
Description	Number of students enrolled in target grade		
Procedure	C_GENROL = IC4G22A+ IC4G22B		
Source	On [1 September 20xx], what was the total enrolment (number of students) for [target grade]?		
	Number of boys	IC4G22A	

Number of girls

IC4G22B

Variable Name	C_GENROL_CAT
Description	Number of students enrolled in target grade - categorized
Procedure	Categorize C_GENROL
Source	On [1 September 20xx], what was the total enrolment (number of students) for [target grade]?
Recode	1 = 1-100 2 = 101-200 3 = more than 200

Variable Name	C_TGPERC
Description	Percentage of target grade students at school
Procedure	$C\_TGPERC = (C\_GENROL/C\_SCSIZE)*100$
Source	C_GENROL, C_SCSIZE

Variable Name	C_URBAN		
Description	Urbanicity of school		
Procedure	Simple recoding		
Source	Which best describes the immediate area in which this school is located?		
	A village, hamlet, or rural area (fewer than 3,000 people)	IC4G23	Recoding
	A small town (3,000 to about 15,000 people)	1	0

## APPENDIX D: RESTRICTED USE ITEMS

### Overview

Twenty-eight test items used in the ICCS 2022 main survey have been designated as ICCS 2022 restricted use items.

Twenty-two of these items were completed by students participating in both the paper-based and computer-based delivery modes. The remaining six items comprise one computer-enhanced module that was completed by students in the computer-based delivery mode only. These items are presented as screenshots in this document.

This appendix includes summary item information for all items in the restricted use item set and the full text for the 15 sample items from the ICCS 2022 international report.

Full texts for the 13 items in the restricted use item set that are not sample items from the ICCS 2022 international report are available only on request from IEA.<sup>1</sup>

## About the restricted use items

The summary information for the restricted use items includes:

Item ID:	The unique item identifier used in the test and reported in the ICCS international database.
Sample item #:	The number of each sample item as presented in the ICCS 2022 international report.
Trend status:	Trend items are those developed and first used in a previous cycle of ICCS and used again in ICCS 2022
Format:	The item format as either MC (four option multiple choice), CR (constructed-response requiring students to write one or more sentences), DI (dynamic interactive — where feedback to the student is affected by their response to the item), or DD (drag and drop).
Key:	For multiple choice items, the key is the correct response. The key is numbered 1, 2, 3, or 4 to indicate the ordinal position of the correct response in the set of four response options. For items with other formats, please refer to the ICCS 2022 International Report to see summary details of the scoring guide.
Max score:	The maximum score for the item.
Content domain:	The content domain reference to the ICCS 2022 assessment framework.
Cognitive domain:	The cognitive domain reference to the ICCS 2022 assessment framework.
Delivery mode	This denotes the delivery mode in which the item was available to students, computer-based (CBA) and/or paper based (PBA).

The sign below is in a National Park in [Exland].

**[White Water] National Park**

Visitors must obey the following rules:

- Do not litter
- Do not light camp fires
- Do not feed the wild animals
- Camp only in camping areas

Heavy penalties apply.

CI3NPM1

Why does the national park have rules?

- to protect the national park and keep people safe
- to discourage people from visiting the national park
- to raise money for the national park from the fines
- to warn people about dangers in the national park

[Female Name 1] 'I do not want to visit the national park. There are too many rules.'

[Female Name 2] 'The rules are sensible. I am happy to obey them.'

CI3NPM2

Which reason best explains why [Female Name 2] is happy to obey the rules?

- [ Female Name 2] thinks that rules should never be questioned.
- [ Female Name 2] understands that the rules are for everyone's benefit.
- [ Female Name 2] is frightened of the punishment for disobeying the rules.
- [ Female Name 2] does not understand that the rules limit his activities in the park.

*Restricted use item 3 (CBA and PBA)*

[Male name 1] is charged with a serious offence. [Male name 1's] father is a senior politician. When the police find out that [Male name 1's] father is a senior politician they drop the charges and Restricted use [Male name 1].

CI4DCM1

Why are the actions of the police undemocratic?

- In a democracy people are innocent until proven guilty.
- In a democracy police do not have the right to charge someone with an offence.
- In a democracy all citizens have the right to legal representation.
- In a democracy the law must be applied equally to all.

*Restricted use item 4 (CBA and PBA)*

CI3PAM1

What is the most likely reason a person in a democracy would join a political party?

- to help the police with the enforcement of laws
- to decide on sentences for people found guilty of crimes
- to decide on the location of polling booths for national elections
- to participate in activities that influence government policy

*Restricted use items 5 and 6 (CBA and PBA)*

**Fake news** is a term used to describe false or misleading information that is deliberately presented as news.

CI4FKC1

How can the presence of fake news harm a democracy?

Give **two ways**.

**1.**

---

---

**2.**

---

---

CI4FKM2

What can a person do to confirm whether information in a news article is real or fake?

- check whether or not the same information is presented by many different sources
- check whether or not the government agrees or disagrees with the news
- check whether or not their friends believe the news article
- check whether or not the news is [trending] on social media

*Restricted use items 7, 8, and 9 (CBA and PBA)*

[Female name 1] lives in a wealthy country and wants to be [an ethical consumer]. This means that she thinks carefully about what she buys based on how it was made, where it comes from, and the environmental impacts of her purchasing choices.

CI4ECM1

Which one of the following actions is an example of [Female name 1] being [an ethical consumer]?

- She buys only free-range eggs.
- She buys only the cheapest clothing.
- She buys only products from small companies.
- She buys only products with good online reviews.

CI4ECM2

[Female name 1] visits a website with information for [ethical consumers].

What information is she most likely to find on this website?

- how much products cost to be delivered
- what the working conditions are for people who make the products
- how popular the products are on the international market
- which countries the products are readily available in

CI4ECM3

[Female name 1] decides to only buy products that are produced close to where she lives.

What about [Female name 1's] decision makes her an [ethical consumer]?

- The products are transported short distances to get to her.
- The products are of better quality than those made elsewhere.
- It is easy for her to contact the producers if she has a complaint.
- It is likely that she can get her friends to buy the same products.

CI4ZSM1

A sports club has decided to change the way decisions are made about how the club is run. They have decided to allow all members to use a phone app to vote directly on proposals, rather than having a committee make all the decisions.

How is having **members vote** on proposals a more democratic way to make decisions than relying on a committee?

- All members will be satisfied with decisions.
- Using the phone app is likely to be more fun.
- All members can be involved in decision-making.
- There is less risk of individuals interfering in decision-making.

CI4ZSD2

The app has three features that support the voting process for members.

**What democratic value does each app feature reflect?**

Drag and drop each app feature onto its matching democratic value.

There will be one democratic value without a matching app feature.

### App Features

The app does not display the names of voters.

The app locks out members after they have voted.

The app supports the use of text to speech readers.

### Democratic Values

**Voting must be accessible to all members.**

**Each member may only vote once.**

**The votes of members must be kept secure.**

**Members should be able to vote without pressure from others.**

Restricted use item 12 (CBA only)

CI4ZSL3

The club is about to have its first vote and wants the fairest outcome.

The proposal is:

**We should spend this year's unused funds on new equipment.**

The club has 80 members.

You need to think about the answers to the following questions in order to set up the app.

1. Should the app be used to confirm the identity of the member voting?
2. Should each member's vote be kept secret or not?
3. How long should the voting period last?

Select one option from each category to set up the app.

Click on  to submit your chosen app settings.

After you click on  you cannot go back and change your answer.

### App settings for voting rules

1. **Voter identity confirmation**

Members must enter their mobile phone number (verified by an SMS code) before they are able to vote

Members can vote directly from the app without confirming their identity
2. **Voter privacy**

Voters can see how others voted

Votes are kept secret
3. **Time period during which the app can accept votes**

6am to 6.30am on a single day

6am to 6pm on a single day

The result of the vote and feedback from members is shown.

You can close the feedback report to see the app setting you chose. You can open and close the feedback report as often as you need to.

Which of the two app settings shown below do you think is more important for ensuring the voting process is fair?

**Choose one app setting and explain why you think it is important.**

Voter privacy

Time period during which the app can accept votes

### Voting Report

**Proposal:** *We should spend this year's unused funds on new equipment.*

Yes

7

No

**Result:** *Rejected*  
*More than half the votes were 'No'.*

**Feedback from members**

- Many members thought the voting period was too short.
- Many members did not vote because they were afraid that others might not like how they voted.

The IEA's International Civic and Citizenship Education Study (ICCS) investigates the ways in which young people around the world are prepared to undertake their roles as citizens. ICCS 2022 is the third cycle of the study, which was initiated in 2009 and repeated in 2016. Based on data from 24 countries or benchmarking participants from Europe, Latin America, and Asia, ICCS 2022 studies contexts for and learning outcomes of civic and citizenship education in a wide range of national contexts at the beginning of the third decade of the 21st Century.

The ICCS 2022 user guide describes the content and format of the ICCS 2022 international database. It introduces the use of weighting and variance estimation variables for analyzing the ICCS 2022 data and provides a comprehensive overview of how to work with the IEA's International Database (IDB) Analyzer software. The ICCS 2022 user guide is accompanied by four appendices: the international versions of all questionnaires; an overview of national adaptations to the national versions of the ICCS 2022 international questionnaires; derived variables used in the ICCS 2022 international and regional reporting; and a set of restricted-use civic knowledge items, together with their respective scoring guides, to illustrate the test contents.

Over the past 50 years, the IEA has conducted comparative research studies in a range of domains focusing on educational policies, practices, and outcomes in many countries around the world. Prior to ICCS 2022, the IEA had conducted four international comparative studies of civic and citizenship education: The first IEA Civic Education study in 1971, the second IEA Civic Education Study (CIVED) in 1999, the first cycle of ICCS in 2009 and the second cycle in 2016. ICCS 2022 data will allow education systems to evaluate the strengths of educational policies, from a comparative perspective, and to measure progress in achieving critical social objectives of their educational policy agendas.
